

Sescom SES-LR-REMIX Datasheet

DESCRIPTION:

The Sescom SES-LR-REMIX is a stereo headphone volume control that offers precise level adjustment for any listening setup. With independent left- and right-channel volume controls, it lets you balance your stereo mix exactly as you need it. Its passive design requires no batteries or power supply, ensuring consistent, transparent sound quality. Ideal for monitoring, recording, casual listening, or to help with hearing imbalance.

Sescom Tech Note: When using the SES-LR-REMIX it is recommended to make your source volume **hotter than you will ultimately need it**, and adjust the volume down. Not compatible with TRRS or Phantom power. Not compatible with TRRS or Phantom power
